NOTE:-

Kerala Public Service Commission vide Resol.No.12 dated 18.02.2013 to standardize the marks secured by the candidates from different Universities for the post of Assistant Surgeon in Health Services Department.

-----  
The Kerala Public Service Commission constituted the Committee to standardize the marks of candidates in their qualifying examination from different Universities.

The candidates are stratified as 1) from Indian Universities, 2) from Chinese Universities and 3) from Russian Universities. The range of variation of the marks of candidates from Indian Universities is 50% to 79%. The range of variation of the marks of candidates from Chinese Universities is 53% to 87% and the marks of candidates from Russian Universities vary from 50% to 60%. From these statistics it is clear that if candidates are ranked based on the marks of the qualifying examination as it is, even the top candidates from one stratum may completely wiped out from the rank list or their chance of getting better ranks may get reduced. In this context, the committee came to the conclusion that “for a fair ranking, the marks should be standardized before ranking the candidates”.

The committee studied the distributions of marks in detail and examined different standardization procedures like “maximum percentage equalization method”, “global mean method” etc. Since the population statistics of different strata are not available, if we use the maximum percentage method, a poor performed candidate from a particular stratum may get undue advantage. Global mean procedure also not working well in this case due to the non-availability of population statistics.

The committee arrived at a procedure in which the quartile means will be equalized. This procedure ensures a proportional representation for all the streams in the different levels of ranks.

The procedure is explained below:

Quartiles of the marks of each stream are computed. That is the marks up to the 25<sup>th</sup> percentile (Q1) is the first quarter, 25<sup>th</sup> percentile to 50<sup>th</sup> percentile(Q2) is the second quarter, 50<sup>th</sup> percentile to 75<sup>th</sup> percentile(Q3) is the third quarter and 75<sup>th</sup> percentile to the maximum is the fourth quarter. The mean scores of all quarters of all streams are computed.

The standardized mark of the k<sup>th</sup> candidate of the j<sup>th</sup> quarter in i<sup>th</sup> stream= $(X_{ijk} \times M_j) / Y_{ij}$

Where  $X_{ijk}$ -is the mark scored by the k<sup>th</sup> candidate of the j<sup>th</sup> quarter in the i<sup>th</sup> stream.

$M_j$ -is the mean mark of the j<sup>th</sup> quarter in the stream in which marks are high in general (here Chinese Universities).

$Y_{ij}$ -is the mean mark of the j<sup>th</sup> quarter in the i<sup>th</sup> stream.

-----
