## 167/2015

The angle between two curved lines is known as : 1. (A) Spherical angle (B) Obtuse angle (C) Acute angle (D) Deflection angle Which of the following is the classification based upon the system of surveying ? 2. Triangulation surveying (A) Chain surveying (B) (C) City surveying (D) Mine surveying The survey that does not deal with mapping of large water bodies is : 3. (A) Hydrographic Survey (B) Navigation Survey (C) Marine Survey (D) Cadastral Survey During the office work, surveyor does : 4. (A) Design of structure (B) Selection of site (C) Recording field book (D) Selecting system of work If distance on drawing 2.5 cm, actual distance of object 1m. Then representative factor of 5. scale is : (B)  $\frac{100}{2.5}$ (D)  $\frac{2.5}{1}$ (A)  $\frac{1}{2.5}$ (C)  $\frac{1}{40}$ The simplest figure which can be plotted without angles but with sides : 6. (B) Octagon (C) Hexagon (D) Triangle (A) Pentagon The Survey line which fixes up the direction of all other Survey line is : 7. (A) Tie line Base line (C) Check line (D) None of these (B) The Instrument which automatically records the number of steps taken placing in a given 8. survey line : (A) Pedometer Odometer (C) Passometer (D) Speedometer (B) 3 A {P.T.O.} One significance of 'Y level' : 19. (A) No loose part Peg adjustment is inconvenient (B) (C) No wearing of parts (D) Not rigid in construction

- 20. Which of the following, Bench mark is established with high precision ?
  - (A) Permanent Benchmark (B) G. T. S. Benchmark
  - (C) Temporary Benchmark (D) None of these

21. If higher contours are inside and lower contours are outside, object will be :

- (A) Hill (B) Depression in ground
- (C) Ridge line (D) Valley line

22. Which one is one significance of direct methods of contouring ?

(A) Very cheap(B) Used for hilly area(C) Most accurate(D) Route Survey for Canal

23. The need of drawing cross section from a contour map is to calculate :

- (A) Total length of road (B) Slope
- (C) Alignment (D) Earth work

## 24. Contour line cross each other in case of :

- (A) Ridge line (B) C
- (C) Valley line (D
- (B) Overhanging cliff(D) None of these
- 25. Contour Interval is kept higher when :
  - (A) Money available is limited
  - (C) Work is not important
- (B) Field work is smaller
- (D) Office work is smaller

A

5

167/2015 {P.T.O.}

9.	Too long chain may be adjusted by :
	(A) Closing up the joints (B) Inserting new ring
	(C) Replacing large size rings (D) Straightening any link
10.	One of the duties of leader in chain surveying is :
	(A) Pick up the arrows (B) To obey instruction of follower
	(C) To carry rear end of chain (D) Stretching chain tight
11.	The surveying best suited for dense area and fall of many details is
	(A) Plane table surveying (B) Chain surveying
	(C) Theodolite surveying (D) Compass surveying
12.	Part of compass adjusting the prism according to eye height is :
	(A) Hinged strap (B) Lifting lever (C) Focussed stud (D) Eye vane
13.	Whole circle bearing 176° equal to quadrantal bearing of :
	(A) $E 4^{\circ} S$ (B) $S 176^{\circ} E$ (C) $S 4^{\circ} E$ (D) $N 4^{\circ} W$
14.	The difference between forebearing and backbearing of a survey line should be :
	(A) 180° (B) 0° (C) 360° (D) 90°
15.	In which step of field works, area of plot is divided into polygon or triangle, in compass
	(A) Marking station (B) Reconnaissance of area
	(C) Traversing (D) Plotting
16.	Which one is, in the following, that does not have the object of levelling ?
	(A) To fix Benchmark (B) To find profile of road
	(C) Indirect ranging (D) To show contour
26.	Which one is not a part of Telescopic alidade ?
20.	which one is not a part of relescopic and de ?

(A) Vertical Circle (B) Support

(C) Horizontal Circle (D) Fiducial edge

27. Systematic operation of temporary adjustment of planetable is :

- (A) Orientation after observation (B) Observation after orientation
- (D) (C) Levelling after orientation Centering after levelling

28. Magnetic needle method is used in plane table when :

- - (A) Required less accuracy
- (B) doing survey at any place
- (C) Second station is available (D) No possibility of error
- When surveying control from a single station and in smaller area, the method of 29. surveying is :
  - (A) Two point problem (B) Radiation
  - (C) Three point problem (D) Intersection method
- Merits of plane table Surveying is : 30.
  - (A) Can replot the map Surveying done in wet climate (B)
  - (C) Recommended for precise work (D) Suitable for small scale map

When calculating boundary area, total no. of ordinates must be odd in : 31.

- (A) Trapezoidal rule (B) Average ordinate rule
- (C) Mid Ordinate rule (D) Simpson's rule
- Three successive ordinates are 2m, 1m and 2m and interval between ordinates is 10m, Then 32. area enclosed by ordinate by Simpson's rule in m<sup>2</sup> :
  - (A) 27 (B) 30 (C) 26.67 (D) 33.33

167/2015

33.	A ce	eylon ghat tracer	does :	not consist :					
	(A)	Tripod			(B)	Bras	s sighting tube		
	(C)	Small hole			(D)	Cros	ss wire		
	-								
34.	Sext	end is used for m	neasur	ring :					
	(A)	Bearing	(B)	Length		(C)	Angle	(D)	Slope
35.	The	instrument which	n is ha	aving mirror	, meta	al fran	ne and gimbal is	. :	
	(A)	Box sextent	(B)	Clinomete	r	(C)	Ghat tracer	(D)	Hand level
	( )		(-)			(-)		(-)	
36.	A The plan	heodolite whose le about it's horiz	telesc ontal	ope can be axis, is knov	revol <sup>.</sup> vn as	ved ti	hrough a compl	ete rev	olution in vertica
	(A)	Vernier theodol	ite		(B)	Mici	cometer theodoli	te	
	(C)	Alidade theodo	lite		(D)	Trar	sit theodolite		
37.	Size	of theodolite vari	ies fro	om :					
	(A)	10 to 30 cm	(B)	10 to 30 m	m	(C)	5 to 10 cm	(D)	30 to 35 cm
38.	Thre	e screw type theo	odolite	e is preferred	d whe	en :			
	(A)	Centred more q	uickly	7	(B)	Leve	elled more quickl	y	
	(C)	Parallaxing mor	e qui	ckly	(D)	Dist	ributing uneven	pressu	re on screw
20	Thee	dalita atan danda	and h		-f .				
39.	$(\Delta)$	C	(B)		01.	(C)	^	(D)	c
	(11)	2	(D)	0		(C)	А	(D)	5
40.	Leas	t count of transit	theod	lolite reading	g:				
	(A)	30 minutes	(B)	20 minutes	3	(C)	1 minute	(D)	20 seconds
41.	Plun	nb bob of theodol	ite is s	suspended fr	: com				
	(A)	plate	(B)	hole		(C)	hook	(D)	ring
42.	Axis	about which tele	scope	of theodolit	e can	be ro	tated in horizon	tal plan	ne is known as :
	(A)	Vertical axis	10		(B)	Hori	zontal axis		
	(0)	TAIS OF TELESCOP			(D)	AXIS	or lever tube		

A

7

167/2015 {P.T.O.}

43.	In d	ouble Vernier the	eodoli	te :					
	(A)	Main scales are	mark	ed in one d	irectio	on			
	(B)	Main scales are	mark	ed in both o	directi	ions			
	(C)	Attached single	e vern	ier					
	(D)	One single verr	nier is	marked					
44.	Whe	en focussing object	et glas	s, Telescope	is:				
	(A)	Transited				(B)	Inverted		
	(C)	Rotated				(D)	Directed to ol	oject	
			ľ.	g					
45.	Dire	ct angle Obtained	l from	theodolite	may 1	be bet	ween :		11. 210
	(A)	0° and 360°	(B)	0° and 90°		(C)	0° and 180°	(D)	None of these
46.	Poin	t of curve is also	know	n as :					
	(A)	apex			(B)	end	of curve		
	(C)	beginning of cu	rve		(D)	poin	t of intersectior	1	
47	Relat	tion between Rad	ine 'D	'and doors	f -			1. 1.11	And the second
17.	Rela	non between Kau	ius in	and degree	e or c	urve i	J in curve settir	ig, for 2	20 m chain, is :
	(A)	$R = \frac{20}{D}$	(B)	R=20 D		(C)	$R = \frac{1719}{D}$	(D)	$R = \frac{1146}{D}$
		Ľ					D		D
48.	Com	pound curve has							
10.	(A)	Curves in oppos	ite di	rection		(B)	Area of difform	nt vo di	
	(C)	Length of straig	ht line	between C	IITVOS	(D)	Arcs of same r	adine	us
	(-)		in mit	. Detricen e	uives	(D)	Arts of same i	autus	
49.	If tar	igent distance 20	m an	d radius of	curve	e 200	m. when settin	o out c	urve Radial offset
	from	tangent is equal	to :					goure	arte, manar onser
	(A)	1 m	(B)	20 m		(C)	200 m	(D)	None of these
	75	a di							
50.	Magr	nitude of Centrifu	igal fo	orce along a	curve	ed trad	ck, generally is	:	
	(A)	Inversely Propor	tional	to weight o	of veh	nicle			
	(B)	Inversely Propor	tional	to radius o	of curv	vature			
	(C)	Inversely Propor	tional	to speed of	vehi	cle			
	(D)	None of these							

167/2015

8

51.	For the	computation	of	earth	work,	the	data	not	required	is	•
-----	---------	-------------	----	-------	-------	-----	------	-----	----------	----	---

- (A) Formation width (B) Bottom width of cutting
- (C) Top width of cutting (D) Top width of embankment

52. Full detailed survey work along the most economical route of road is done by :

- (A) Reconnaissance survey (B) Traffic survey
- (C) Preliminary survey (D) Location survey

53. A road has given maximum gradient 1 in 50 minimum gradient 1 in 200. What will be possible exceptional gradient value when designing same road ?

(A) 1 in 100 (B) 1 in 50 (C) 1 in 30 (D) 1 in 200

54. General application of 'chain thin double dash line' in engineering drawing :

- (A) Centroidal line (B) Central line (C) Hidden out line (D) Cutting plane
- 55. The line passing through the focus and perpendicular to the directrix in conic technology is :
  - (A) Normal (B) Axis (C) Tangent (D) Base line
- 56. The command allowing to set lower left corner and upper right corner of drawing area in autocad is :
  - (A) Rectangle (B) View (C) Point (D) Limit
- 57. To draw two rectangles  $50 \times 100$  cm and  $250 \times 350$  cms, in autocad, set the snap to :

(A) 100 (B) 250 (C) 50 (D) 350

58. Which command in autocad, connect between two lines or arcs or circles with an arc?

- (A) Fillet (B) Circle (C) Arc (D) Line
- 59. The term 'Lap' represents in brick masonry as :
  - (A) Vertical distance (B) Horizontal distance
  - (C) Inclined distance (D) None of these

60. A junction means connection between a main wall and a : (A) Floor **(B)** Main wall (C) Basement floor (D) Partition wall 61. Inclined surface of brick work should be checked by : (A) Spirit level (B) Plumb bob (C) Wooden template Square (D) Brick should be saturated with water before making wall so as to prevent absorption of 62. moisture from : (A) Mortar (C) Ground (B) Air (D) None of these 63. Magnet represents all material which attracts : (A) Silver (B) Aluminium (C) Wood (D) Iron '4  $\cos^3 \alpha$  – 3  $\cos \alpha'$  is equal to : 64. (B)  $\cos 4\alpha$  (C)  $\cos 2\alpha$  (D)  $\cos \frac{\alpha}{2}$ (A)  $\cos 3\alpha$ 65.  $\tan \alpha$  is equal to : (A)  $\sqrt{\frac{1-\sin 2\alpha}{1+\sin 2\alpha}}$  (B)  $\sqrt{\frac{1-\cos 2\alpha}{1+\cos 2\alpha}}$  (C)  $\sqrt{\frac{1+\sin 2\alpha}{1-\sin 2\alpha}}$  (D)  $\sqrt{\frac{1+\cos 2\alpha}{1-\cos 2\alpha}}$ 66. Simplify (sec  $\theta$  + tan  $\theta$ ) (1 - sin  $\theta$ ) : (A)  $\sin \theta$ (B)  $\tan \theta$ (C)  $\cos \theta$ (D) cosec  $\theta$ Evaluate  $\frac{\sin 10^\circ}{\cos 80^\circ}$ : 67. (A) 1 (B) 2 (C) cos 10° (D) sin 80° 68. An example which is not optical medium in light theory is : (A) Air (B) Stone (C) Water (D) Glass 167/2015 10 A

69.	A glass jar contains water to a depth of 32 cm. A button placed at the bottom appears to a depth of 24 cm. Then refractive Index :									
	(A)	$\frac{3}{4}$	(B)	$\frac{4}{3}$		(C)	$\frac{2}{3}$	(D)	$\frac{3}{2}$	
70.	The	angle between tw	70 sur	faces at wh	ich re	fractio	on takes pl	ace is called	:	
	(A) (C)	Angle of Incider Angle of emerge	nce ence		(B)	Ang Ang	le of refra- le of prism	1		
71.	Forn	nula for total surf	ace ar	rea of a hen	nisphe	re of :	radius r :			
	(A)	πr <sup>2</sup>	(B)	$2\pi r^2$		(C)	$3\pi r^2$	(D)	$4\pi r^2$	
72.	If a -	b=9 and $ab=20$	). Find	$d a^2 + b^2$ :						
	(A)	41	(B)	81		(C)	40	(D)	20	
73.	If ma	ajor axis 6 cm and	l mine	or axis 4 cm	n, area	of ell	ipse in cm	<sup>2</sup> is :	6-	
	(A)	2411	(D)	10π		(C)	1.54	(D)	011	
74.	If sic	les of a triangle a	re 4 c	m and 5 cm	n and a	angle	between th	hem is 30°, A	rea of triangle is	:
	(A)	$\frac{10}{\sqrt{3}}$ cm <sup>2</sup>	(B)	$5\sqrt{3}$ cm <sup>2</sup>		(C)	5 cm <sup>2</sup>	(D)	10 cm <sup>2</sup>	
75	Proc	tical application of	of hyp	orbola is in					5 <u>5</u> 17 0,77	
75.	(A)	Construction of	dam	erbola 13 11	(B)	Stud	y laws of	expansion of	gas	
	(C)	Man hole of boi	ler		(D)	Stuf	fing box g	lands		
76	Fyal	$\frac{1}{5}$ +	1	- <u>-</u>						
70.		$\sqrt{3} + \sqrt{2}$	√3 -	· √2 ·		(C)	0 /5	(П)	2.5	
	(A)	3√2	(Б)	- 2√3		(C)	2√3	(D)	- 3√2	
77	Eval	$\frac{1}{3}$	1							
	Lvai	$\left(\frac{1}{2\sqrt{2}}\right)^{-1}$	2√2							
	(A)	$\frac{2\sqrt{9}}{32}$	(B)	$\frac{2\sqrt{32}}{9}$		(C)	$\frac{32\sqrt{2}}{9}$	(D)	$\frac{9\sqrt{2}}{32}$	
		and the second second		ale et					4 19-1 <sup>0</sup> 2	
									1 ( = 1 = 0	-

A

78.	In quadratic equation $4x^3 + 3x + 5 = 0$ , sum of their roots is equal to :									
	(A)	$-\frac{3}{4}$	(B)	$-\frac{5}{4}$		(C)	$-\frac{3}{5}$	(D)	$-\frac{4}{5}$	
79.	Writ	te one factor of th	ne terr	n $x^2 - x - 6$	:					
	(A)	<i>x</i> + 3	(B)	x - 3		(C)	x - 2	(D)	x - 1	
80.	In th	ne quadratic equa	tion 3	$5x^2 - 5x + 2 =$	=0 dis	crimir	nant value is eq	ual to :		
	(A)	3	(B)	2		(C)	- 5	(D)	1	
81.	Eval	uate log <sub>10</sub> 1000+	log_ e	:						
	(A)	4	(B)	log <sub>e</sub>		(C)	log 10	(D)	log(e+1000)	
82.	Eval	uate $\log_{10} 10^{e} + 10^{e}$	og e <sup>2</sup>	-e:			in the second		t the local data and the second se	
	(A)	10 <sup>e</sup>	(B)	e		(C)	2	(D)	e <sup>2</sup>	
83.	Equi	al chords of circle	e alwa	vs subtend	equal	angle	at :			
	(A)	circle		(B)	cent	re of c	rircle			
	(C)	outside of circle		(D)	insic	le of c	ircle			
84.	Bise	ctor of an angle o	f the t	riangle divi	de the	e oppo	osite side in the	ratio of	:	
	(A)	Sides containing	g the	angle	(B)	Rem	aining angles o	f triang	le	
	(C)	1:1			(D)	Non	e of these			
85.	Leng	gth of tangents dr	awn i	from an exte	ernal j	point	to a circle are ir	the ra	tio of :	
	(A)	1:2	(B)	1:3		(C)	1:4	(D)	1:1	
86.	Any alon	rays passing the g the :	rough	the centre	of cu	rvatu	re of spherical	mirror	are reflected back	
	(A)	different angle	(B)	Same path	n	(C)	Principal axis	(D)	None of these	
167/	2015				12				A	

In a	concave mirror, pos	ition of objec	t is be	yond	the centre of cur	vature	e, position of image			
7. In a concave mirror, position of object is beyond the centre of curvature, position of image will be :										
(A)	Behind the mirror									
(B)	Between focus and	pole								
(C)	Between centre of a	curvature and	l focus	5						
(D)	Beyond the centre of	of curvature								
The	material which do no	ot allow light	to pas	ss thro	ough them at all	is calle	ed :			
(A)	source of light (B	) opaque		(C)	transparent	(D)	concave glass			
					1		0			
Whe	en a material is subjec	ted to extern	al forc	e, stre	ess is induced :					
(A)	outside the materia	l	(B)	only	at surface					
(C)	at their corner		(D)	insic	le the material					
Within limit of proportionality, the ratio between intensity of stress and strain, when it undergoes deformation, is :										
(A)	Constant		(B)	Vari	able					
(C)	1:1		(D)	Inve	rsely proportion	al				
The	bending moment at t	he free end o	f a car	ntileve	er will always be	:	$(r_1, \dots, r_k^{t_k}))$			
(A)	Negative bending n	noment	(B)	Posi	tive bending mo	ment				
(C)	Zero		(D)	Char	nging the BM sig	gn	and the second			
'Buil	t in beam' is also kno	wn as .								
(A)	Simply supported h	eam	(B)	Fixe	d beam		1.1

500</li> <li>(B) 1000</li> <li>(C) 1500</li> <li>(D)</li> </ul> </li> </ul>			

{P.T.O.}

**95.** To prepare the preliminary estimate for an irrigation channel, the rate is calculated based upon :

- (A) Per unit basis (B) Per head of population
- (C) Area of land commands (D) Per litre of water

96. When constructing In circle of a triangle, the centre of circle will be getting when :

- (A) bisecting sides of triangle (B) bisecting any one angle of triangle
- (C) bisecting any one side of triangle (D) bisecting any two angles of triangle

97. Evaluate  $\cot \theta + \tan (180 + \theta) + \tan (90 + \theta) + \tan (360 - \theta)$ :

(A) Zero (B)  $\cot \theta$  (C)  $\tan \theta$  (D)  $-\cot \theta$ 

98. Write expression  $\left(x + \frac{3}{x}\right) = 4$  in the form of quadratic equation : (A)  $x^3 + 3 = 4x$  (B)  $x^2 - 4x + 3 = 0$  (C)  $x^2 + 4x = 3$  (D)  $x^2 + 4x + 3 = 0$ 

- 99. Area of regular hexagon having side 'a' :
  - (A)  $\frac{2\sqrt{2}}{3}a^2$  (B)  $\frac{3\sqrt{2}}{2}a^2$  (C)  $\frac{3\sqrt{3}}{2}a^2$  (D)  $\frac{2\sqrt{3}}{3}a^2$

**100.** If  $\log 0.2521 = -0.5984$ , Evaluate  $\log 0.02521$  approximately :

(A) -0.0584 (B)  $\overline{1}.0584$  (C) -2.4150 (D)  $\overline{2}.4015$ 

-000-
