- A:-Memory
- B:-Perception
- C:-Learning
- D:-Intelligence

Correct Answer:- Option-C

Question5:-Long-standing, low-intensity and often permanent disorders such as Alzheimer's dementia comes under the category of

- A:-Acute
- B:-Chronic
- C:-Episodic
- D:-Recurrent

Correct Answer:- Option-B

Question6:-The number of new cases of a mental disorder that occur over a given period of time refers to

- A:-Prevalence
- B:-Point prevalence
- C:-Lifetime prevalence
- D:-Incidence

Correct Answer:- Option-D

Question7:-In which personality disorder does the persons display a pattern of instability of interpersonal relationships, self image, affects and marked impulsivity that begins by early adulthood and is present in a variety of contexts ?

- A:-Schizoid
- B:-Schizotypal
- C:-Borderline
- D:-Avoidant

Correct Answer:- Option-C

Question8:-The type of delusion that involve the conviction that a major catastrophe will occur

- A:-Persecutory
- B:-Grandiose
- C:-Nihilistic
- D:-Somatic

Correct Answer:- Option-C

Question9:-Functional neurological symptom disorder is also known as

- A:-Conversion disorder
- B:-Somatic symptom disorder
- C:-Illness anxiety disorder
- D:-Hypochondriasis

Correct Answer:- Option-A

Question10:-The distress that may accompany the incongruence between one's experienced or expressed gender and one's assigned gender.

- A:-Gender assignment
- B:-Gender reassignment
- C:-Gender identity
- D:-Gender dysphoria

Correct Answer:- Option-D

Question11:-Cluster A personality disorders are

- A. Paranoid, Schizoid and Schizotypal
- B. Paranoid, Schizoid and Borderline
- C. Schizoid, Dependent and Avoidant
- D. Schizoid, Schizotypal and Borderline

- A:-A
- B:-B
- C:-C
- D:-D

Correct Answer:- Option-A

Question12:-The type of amnesia in which the individual loses memory for a specific category of information

- A:-Generalized
- B:-Systematized
- C:-Continuous
- D:-Selective

Correct Answer:- Option-B

Question13:-If a child has not learned appropriate toileting for bowel movements after age four, he is said to have

- A:-Embolism
- B:-Encephalitis
- C:-Enuresis
- D:-Encopresis

Correct Answer:- Option-D

Question14:-Which negative symptom of schizophrenia is characterized by a decrease in motivated self-initiated purposeful activities ?

- A:-Anhedonia
- B:-Alogia
- C:-Avolition
- D:-Asociality

Correct Answer:- Option-C

Question15:-Mimicking another person's movements.

- A:-Echolalia
- B:-Echopraxia
- C:-Stupor

D:-Waxy flexibility

Correct Answer:- Option-B

Question16:-Situational phobia does **not** include the fear of

A:-Airplanes

B:-Elevators

- D:-Hemineglect

Correct Answer:- Option-B

Question31:-Providing enough information to the participants is an experiment do enable people to judge whether they want to accept any risks inherent in being a participant is known as

- A:-Privileged communication
- B:-Informed consent
- C:-Feedback
- D:-Demographic data sheet with instructions

Correct Answer:- Option-B

Question32:-When the level of alcohol in the blood drops suddenly, it is known as

- A:-Withdrawal symptom
 - B:-Tolerance
 - C:-Delirium tremers
 - D:-Substance dependence
- Correct Answer:- Option-C

Question33:-The practice of beginning one's therapeutic efforts with the least expensive and least intrusive intervention possible and moving on to more expensive or more intrusive interventions only if necessary. This is referred to as

- A:-Stepped care
 - B:-Replase prevention
 - C:-Environmental modification
 - D:-After care
- Correct Answer:- Option-A

Question34:-Dopamine is a

- A:-Monoamine neurotransmitter
 - B:-Amino acid neurotransmitter
 - C:-Soluble gas neurotransmitter
 - D:-None of the above
- Correct Answer:- Option-A

Question35:- _____ is where one generates and store our cognitive map of our environment.

- A:-Hypothalamus
 - B:-Cerebellum
 - C:-Hippocampus
 - D:-Amygdala
- Correct Answer:- Option-C

Question36:-Electrical synapses is also called as

- A:-Synaptic transmission
 - B:-Gap junctions
 - C:-Terminal buttons
 - D:-Refractory period
- Correct Answer:- Option-B

Question37:- _____ is a method that assists subjects to control their brain waves consciously.

- A:-Neurofeedback
 - B:-Yoga
 - C:-MEG
 - D:-Fmri
- Correct Answer:- Option-A

Question38:- _____ is implicated in perception of danger and triggering of flight or flight response.

- A:-Cerebrum
 - B:-Hypothalamus
 - C:-Basal ganglia
 - D:-Amygdala
- Correct Answer:- Option-D

Question39:-Patterns of extreme disobedience in youngsters, including theft, vandalism, lying and early use of drugs is known as

- A:-Juvenile Deliquence
 - B:-Conduct disorder
 - C:-Antisocial personality
 - D:-Psychopath
- Correct Answer:- Option-B

Question40:-The 10th Cranial nerve is called

- A:-Hypoglossal

B:-Vagus

C:-Oculomotor

D:-Spinal Accessary

Correct Answer:- Option-B

Question41:-Irrational fear of disease is

A:-Algophobia

B:-Mysophobia

C:-Pathophobia

D:-Haematophobia

Correct Answer:- Option-C

Question42:-Social therapy of mental illness is required for

A:-Treatment of psychoses

B:-Maintenance of community health

C:-Rehabilitation of mentally ill people

D:-Prevention of addiction

Correct Answer:- Option-C

Question43:-The three phases of Selye's GAS includes

A:-Alarm and mobilization, resistance, exhaustion

B:-Alarm, exhaustion, resistance and mobilization

C:-Alarm and resistance, mobilization, exhaustion

D:-None of the above

Correct Answer:- Option-A

Question44:-A persistent and disproportionate fear of some specific object or situation that presents little or no actual danger and yet leads to a great deal of avoidance of these feared situations. This condition is referred to as

A:-Generalized anxiety disorder

B:-Phobia

C:-Obsessive compulsive personality disorder

D:-Agoraphobia

Correct Answer:- Option-B

- Correct Answer:- Option-A

Question76:-Cognitive theorists have found that people with psychological disorders often make the kinds of assumption and errors in thinking. Popularity of this model is the impressive performance of cognitive therapies, which are effective for teaching

- A:-Depression, Panic disorder and sexual dysfunction
 - B:-Panic disorder, phobias and depression
 - C:-Sleep disorders, depression and sexual dysfunction
 - D:-Panic dysfunction, depression and sleep disorders
- Correct Answer:- Option-B

Question77:-In 1981 researcher discover that Ritalin helps person's with

- A:-ADHD
 - B:-Suicide
 - C:-Depression
 - D:-Sexual sadism
- Correct Answer:- Option-A

Question78:-First edition of DSM published by the American Psychological Association in the year

- A:-1988
- B:-1952
- C:-2000
- D:-1967

Correct Answer:- Option-B

Question79:-Relative strength of correlation research method is

- A:-Provide general information
- B:-Statistical analysis is possible
- C:-Replicable
- D:-All the above

Correct Answer:- Option-D

Question80:-People with these disorders are chronically unable to resist impulses, drives, or temptation to perform certain acts that are harmful to themselves or to others

- A:-Sexual disorders
- B:-substance related disorder
- C:-Impulse-control disorder
- D:-Adjustment disorders

Correct Answer:- Option-C

Question81:-In an experiment, a variable other than the independent variable is also acting on the dependent variable is

- A:-Moderator
- B:-Mediator
- C:-Categorical
- D:-Confounding

Correct Answer:- Option-D

Question82:-Sphere-shaped deposits of a small molecule known as the beta-amyloid protein that often form in the spaces between cells in hippocampus, cerebral cortex, and certain other brain region are referred as

- A:-Neurofibrillary tangles
- B:-Senile plaques
- C:-Beta-amyloid precursor protein
- D:-Interleukin

Correct Answer:- Option-B

Question83:-Clinicians often using observations systematically for testing people which are

- i. Naturalist observation,
- ii. Analog observation,
- iii. Self-monitoring,
- iv. Clinical observation

- A:-i, ii and iii
- B:-iii and ii
- C:-i and iii
- D:-iv only

Correct Answer:- Option-A

Question84:-An effort to identify a set of common strategies that run through the work of all effective therapists is termed

- A:-An effectiveness of treatment
- B:-A rapprochement movement
- C:-the politics of labeling
- D:-An evidence-based treatment

Correct Answer:- Option-B

Question85:-People with generalized anxiety disorder experience

- i. Excessive or on-going anxiety and worry,
- ii. Difficulty in controlling worry,
- iii. At least 3 of these-restlessness, easy fatigue, irritability, muscle tension, sleep disturbance,
- iv. Significant distress or impairment.

- A:-i and ii
- B:-i and iii

C:-i and iv

D:-i, ii, iii and iv

Correct Answer:- Option-D

Question86:-Mental health volunteers often use a four-stage approach for disaster victims, which consists of an order of presentation like

- i. Provide referrals,
- ii. Encourage expressions of anxiety, anger, and frustration,
