

# DETAILED SYLLABUS FOR THE POST OF SUPERINTENDENT OF SURVEY AND LAND RECORDS IN SURVEY AND LAND RECORDS DEPARTMENT(CATEGORY NO.708/2025)

(TOTAL MARKS - 100)

## Module I (13 Marks)

Elementary Set Theory, Relations, Partial order, Equivalence relation, Functions, bijections, Composition, inverse function, Quadratic equations –relation between roots and coefficients, Mathematical induction, Permutation and combination.

Trigonometric Functions – Identities solution of triangles, heights and distances.

Geometry – Length and area of Polygons and circle.

Solids – Surface area and volume, Euler's formula.

## Module II (12 Marks)

Theory of Numbers – divisibility, division algorithm, gcd, lcm. Relatively prime numbers (Co-primes), Fundamental Theorem of Arithmetic, congruences, solution of linear congruences, Fermat's Theorem.

Matrices – Addition, Multiplication, Transpose, Determinants, singular matrices, inverse, symmetric, skew-symmetric, hermitian, skew-hermitian, Orthogonal matrices, normal form, echelon form, rank of a matrix. Solution of system of linear equations. Eigenvalues, eigenvectors, Cayley Hamilton Theorem.

## Module III (13 Marks)

Calculus - Limits, Continuity, Differentiability, Derivatives, Intermediate Value Theorem, Rolle's Theorem, Mean value Theorem, Taylor and Maclaurin's series, L'Hospital's rule. Partial differentiation, homogeneous functions, Euler's Formula. Applications of differentiation - maxima and minima, critical points, concavity, points of inflection, asymptotes, Tangents and normals.

Integration – methods of integration, definite integrals – properties.

Fundamental theorem of calculus.

Applications of Integration – Area between curves, volume and area of revolution.

Double and Triple Integrals

Conic sections- Standard equations – Parabola, ellipse, hyperbola, Cartesian, Parametric and polar forms.

## Module IV (12 Marks)

Bounded sets, infimum, supremum, order completeness, neighbourhood, interior, open sets, closed sets, limit points, Bolzano Weierstrass Theorem, closed sets, dense sets, countable sets, uncountable sets.

Sequences – convergence and divergence of sequences, monotonic sequences, subsequences.

Series – Convergence and divergence of series, absolute convergence, Cauchy's general principle of convergence of series. The series  $\sum 1/n^p$ .

Tests for convergence of series – comparison test, root test, ratio test. Continuity and uniform continuity, Riemann integrals, properties, integrability.

Complex numbers, modulus, conjugates, polar form,  $n^{\text{th}}$  roots of complex numbers. Functions of complex variables – Elementary functions of complex variables, Analytic functions. Taylor series, Laurent's Series.

## Module V (13 Marks)

Vectors – Unit vector, collinear vectors, coplanar vectors, like and unlike vectors, orthogonal triads (**i**, **j**, **k**) Dot product, cross product- properties. Vector differentiation- unit tangent vector, unit normal vector, curvature, torsion, vector fields, scalar fields, gradient divergence, curl, directional

derivatives. Vector Integration – Line Integrals, conservative fields, Green’s Theorem, Surface Integrals, Stoke’s Theorem, Divergence Theorem.

Differential Equations – Order and degree of differential equations. First order differential equations- solution of Linear equations, separable equations and exact equations.

Second order differential equations- Solution of homogeneous equations with constant coefficients – various types non-homogeneous equations, solutions by undetermined coefficients.

### **Module VI (12 Marks)**

Data Representation: Raw Data, Classification and tabulation of data, Frequency tables, Contingency tables; Diagrams – Bar diagrams, sub-divided bar diagrams, Pie diagrams, Graphs – Frequency polygon, frequency curve, Ogives.

Descriptive Statistics: Percentiles, Deciles, Quartiles, Arithmetic Mean, Median, Mode, Geometric Mean and Harmonic Mean; Range, Mean deviation, Variance, Standard deviation, Quartile deviation; Relative measures of dispersion – Coefficient of variation; Moments, Skewness and Kurtosis – Measures of Skewness and Kurtosis.

Probability: Random Experiment, Sample space, Events, Type of Events, Independence of events; Definitions of probability, Addition theorem, Conditional probability, Multiplication theorem, Baye’s theorem.

### **Module VII (13 Marks)**

Random variables and probability distributions: Random variables, Mathematical Expectation, Definitions and properties of probability mass function, probability density function and distribution function. Independence of random variables; Moment generating function; Standard distributions – Uniform, Binomial, Poisson and Normal distribution.

Bivariate distribution: Joint distribution of two random variables, marginal and conditional distributions.

Correlation and regression: Scatter Diagram, Karl Pearson’s Correlation Coefficient, Spearman’s rank correlation coefficient. Principle of least squares – curve fitting – Simple linear regression.

### **Module VIII (12 Marks)**

Random Sampling Methods: Sampling and Census, Sampling and Non-sampling errors, Simple random sampling, Systematic sampling, Stratified sampling.

Sampling distributions: Parameter and statistic; Standard error, sampling distributions – normal, t, F, Chi square distributions; Central limit theorem. Estimates, Desirable properties of estimate – Unbiasedness, consistency, sufficiency and efficiency.

Testing of hypothesis (basic concepts only) - Simple and composite hypotheses, null and alternate hypotheses, Type I error, Type II error, Level of significance, Power of a test.

***NOTE: - It may be noted that apart from the topics detailed above, questions from other topics prescribed for the educational qualification of the post may also appear in the question paper. There is no undertaking that all the topics above may be covered in the question paper.***
